

Math 194: Problem Set #6

Jesse Kass

Spring 2024

Due in 1 week.

Problem 1

Work on your rough drafts! Please complete at least a one-page draft that includes a complete proof of one major mathematical result that will appear in your final version.

Print out the one-page draft that contains the proof as your homework. We will peer edit these drafts in class.

Your should be on-track to have a polished draft completed by a May 22.

Problem 2

Collaboration Policy

With each week's homework, you must turn in a one paragraph description of all the resources you used on that homework. You must mention any person you talked to about the problems, any book you looked at, any online resource (Wikipedia, Chegg,...) that you used. A sample paragraph is

On this week's homework, I worked on the problem set collaboratively with Gauss and Grothendieck at The Redroom during happy hour. We found an Alex Jones video (<http://youtube.blah.com>) that gave a really clear explanation of Fermat's Last Theorem. We compared our solutions against a solution key that we found on the `/commutativealgebra/` board of 4chan (<http://blah.blah.edu>). We also got really stuck on Problem 5, and so we went to Chegg.com and paid an online tutor ("Zariski") \$50 to solve the problem for us.
