Midterm Corrections

This document describes how to submit midterm corrections to receive additional points. You are allowed to submit a corrected solution to one problem from the exam. You can receive up to half (or 50% rounded up) of the points that you lost.

If you want to submit a corrected solution, please write or type up the correction on a separate piece of paper titled "Corrected Solution" and containing your name. Submit both the corrected solution and your midterm either (a) at the start of class on Friday or (b) in my mailbox in McHenry before the start of class.
